

# Grow Program: Organic Plug Production

**The Nature's Source Difference:** Nature's Source plant foods are high efficiency nutrition formulated with oilseed extract, an all-natural and renewable source of plant nutrition. The low salt formulations enhance nutrient uptake by the plant.

## Feeding Recommendations

---

Water seeded trays thoroughly with Nature's Source Organic 3-1-1 at 200 ppm N, a Direct Inject setting of 1:175. Continue to apply through the mist system every morning for the first 3-4 cycles. Mist the rest of the day with clear water.

Stages 2 and 3: Increase the mist rate to 250 ppm, a Direct Injector setting of 1:150. Increase the number of mist cycles to 5-6 daily to provide more nutrition as the plugs continue to develop.

### Optional:

- 1) Nature's Source Organic 3-1-1 can be applied as a foliar mist starting in propagation and on through the growing cycle of the crop. This application encourages a more compact growth habit with increased tone and enhanced nutrient uptake. Apply at a rate of 2 gallons per 100 gallons of water (2 ounces per gallon) every 7-10 days, to meet desired plant size.

***Nature's Source Benefits:*** Plugs grown with Nature's Source will be full of energy and nutrition, without salt stress for improved transplant success.

***Many Growers report*** more toned, compact plugs with shorter growing time and enhanced root development.
